Euchre

Euchre uses a non standard deck of 24 cards. It's made up of the 9, 10, Jack, Queen, King and Ace of each suit. Some variations also use the Joker, but this version does not. The initial dealer is chosen randomly, in the next round the player to the dealer's left is the new dealer and so on. Five cards are dealt to each player in two rounds of dealing. Once all players have their cards, the top card of the deck is turned face up, so it's ready for the next part of the game.

Euchre is a **trick taking game with a trump, played by four players in teams of two.** The basic play is similar to Whist, i.e. each player plays one card, the highest card of the suit led wins the trick, unless someone has played a card of the trump suit. An important difference from Whist that one of the teams names the trump and must then win the majority of the tricks in that hand. The game is played over several rounds until one team has gotten 10 points.
